

► RotaVal Valve Can Last You a Lifetime

 28 DECEMBER 2018

▣ Valves, Gates & Airlocks

Since 1970, RotaVal have been designing and manufacturing Rotary Valves to suit a wide range of products.

From aggregates to pharmaceuticals, we provide solutions to your solids and bulk handling needs.

For the hard wearing, heavy duty products, our EHD range is ideal. Replaceable rotor blades, end discs and replaceable body liner mean that any damaged caused, can be easily repaired without having to replace the whole unit.

The replacement parts can be fitted onsite by your own engineer, so there is no need for us to come and fit the parts, unless you'd like us to!

EHD Type Valve

For the more delicate products, we offer our hypergienic range. Compromising a stainless steel body and a self-centralising rotor design, they can be dismantled and cleaned in a matter of minutes. We also have the capability to reduce the rotor capacity to assist with a more regulated accurate product flow.

Hypergienic Rotary Valve

All our valves can be ATEX certified and we have a selection that are EHEDG Certified and USDA Dairy Accepted.

With a range of ancillary items, and a superb team of engineers behind them, you can rest assured that your valve will be of lasting quality, and with the correct maintenance, a RotaVal valve can last you a lifetime.
