

Press Release | June 2019

## Gericke FEEDOS Range Expansion

After the introduction of this innovative new type of feeder in 2018, the FEEDOS range has now grown into a complete family of feeders for hygienic and basic applications in the chemical, food and pharmaceutical industry. In addition to the volumetric versions also gravimetric adaptations for even better accuracy are now part of the standard program.

### Easy to Clean, Easy to Maintain

The modular FEEDOS design combines minimum dead zones with good accessibility for cleaning and maintenance. With GERICKE's Easyclean even the most stringent requirements in hygienic applications or frequent product changes can be fulfilled. The swing-hinged feeding chamber option allows even better access to the feeding chamber and intromitter.

### Already Proving its Concept, Every Day

The FEEDOS design has gained very quick acceptance in the market and is already used in various demanding applications, such as infant nutrition, baking ingredients, pharmaceutical formulation and battery production.

### Gravimetric Options

For increased accuracy the advantages of the FEEDOS line can also be combined with various GERICKE scale systems. The established Easydos Pro controller supports platform and suspended weighing solutions and allows for superior weighing accuracy.

### About Gericke

The Swiss Gericke Group has been designing and manufacturing equipment and systems for modern bulk material processes, as well as providing design and consultation services for 125 years. Gericke bulk materials processing technology can be found throughout the world in many sectors including the food, chemical, pharmaceutical, plastics and construction material industries.

Gericke's fully owned group companies employ more than 300 experienced professionals and are located in Switzerland, Germany, Great Britain, The Netherlands, France, USA, Brazil, Singapore, Indonesia, Malaysia, Thailand and China.
