The completely new gravimetric twin screw feeder for applications in pharmaceutical and food industry suits all needs for continuous and batch production. Even cohesive products are dosed accurately and reliably.

The feeder can be delivered as single machine or as part of a fully integrated continuous dosing and mixing station for multiple components formulas.

**Typical applications**
- Dosing and mixing of recipes (API, auxiliaries and glidants) for tablet manufacturing
- Feeding of additives for food industries
- Continuous pharmaceutical production processes

**Advantages**
- Completely encapsulated drive and weighing unit
- Removable feeding unit for fast and hygienic cleaning
- Rotatable mounting for optimal accessibility at the plant
- Negative conical bin for optimised product flow
- Compact construction
- Modular design – Components can be exchanged easily to adapt the feed rate
- Usable for WIP
